

AustraliaOne Party - Riccardo's Brief to AustraliaOne for The Next Phase of Operations - July 18, 2023

Ladies and gentlemen of Australia, the future; it is now in our hands.

Global allied forces have been engaged in military and other operations to end the belligerent occupation by removal of those elements of the cabal who have penetrated the organs of national power. These operations have been successful and only a few low level elements remain to be mopped up.

Good morning ladies and gentlemen of Australia, my names Riccardo Bosi, national leader of AustraliaOne, thanks for joining us.

This message is to the thousands of AustralianOne supporters around the country. I will share with you today a brief which I have recently sent to all the State Coordinators and the executive of AustraliaOne. The subject of the brief is "our actions in the next phase of operations"

INTRODUCTION

Background

The defeat of the cabal in its war against humanity is reaching its final stages. The cabal's war has been an illegal war. They with their servile and useful idiots are guilty of crimes against humanity by conducting political, military, police, judicial, economic, health, media and other operations all at variance with the Geneva Convention, The Hague Convention, The Biological Weapons Convention and other internationally ratified agreements.

One of the preliminary objectives of these operations was the effective occupation and therefore control of every sovereign nation on earth. As a result Australia like all countries has been and remains under what is defined as 'Belligerent Occupation'. The cabal is in effect and has been an 'Occupying Power'.

Belligerent Occupation - A territory is considered to be occupied when it is actually under the authority of an occupying power.

Military occupation requires the suspension of the territory or states authority by the occupying powers authority and the case can be made that this substitution occurred in Australia progressively and over many decades.

So long as the occupying powers factual control is effective no precise number of forces is necessary to constitute effective occupation.

Military occupation does not even require the presence of military forces, although the occupying force must control the most important places and this the cabal has done.

Consider Australia's organs of national power and their role in facilitating the cabal's occupation. The Polity, The Bureaucracy, The Military, The Constabulary, The Media, Academia, Big Business, Big Unions and religious institutions of every stripe.

Finally, there is no legal requirement for the occupying power to issue a proclamation of military occupation.

END OF OCCUPATION

The belligerent occupation ceases when the occupying power no longer 'factually' governs the occupied territory.

Global allied forces have been engaged in military and other operations to end the belligerent occupation by removal of those elements of the cabal who have penetrated the organs of national power.

These operations have been successful and only a few low level elements remain to be mopped up.

Belligerent occupation also ends when the occupying power no longer effectively placed the occupied territory under its control. Such as when an uprising by the local population prevents the occupying power from actually exercising its authority over the occupied territory. Let me say that again...REPEAT...Belligerent occupation also ends when the occupying power no longer effectively placed the occupied territory under its control, such as when an uprising by the local population prevents the occupying power from actually exercising its authority over the occupied territory.

This is where an opportunity presents itself to the people of Australia and in fact the world to play a more direct role in the removal of the cabal and the lawful restoration of national sovereignty.

LAWFUL ACTIONS

Before we continue, it is imperative to note that the operations by the global alliance have been conducted in accordance with the United States Department of Defence Law of War Manual (June, 2015), (updated December, 2016).

It has always been important that the operations of the global alliance are in accordance with the rules of war in order to provide an unassailable moral and lawful foundation for our future actions that must follow our eventual victory.

In the absence of an international legal framework between Australia and the occupying power, AustraliaOne will also defer to the United States Department of Defence Law of War Manual to govern our decisions and our actions. This is of vital importance as the governance of Australia is entering a period of unparalleled instability and secondly, the sovereignty of the future of Australians is equally relied upon defensible, moral and lawful foundations.

RESTORATION OF SOVEREIGNTY

Returning now to assisting the Global Alliance to end the occupation. As stated previously, an uprising by the local population which prevents the occupying power from actually exercising its authority over the occupied territory formally ends the belligerent occupation.

Now to be clear and as we have stated many times in the past, AustraliaOne does not advocate violence of any nature. We are a political organisation seeking a political solution to the damage the cabal has visited upon Australia and her people. Additionally, it is the responsibility of the global alliance to remove the cabal and our responsibility is to demonstrate in a practical way, our support for the Global Alliance's activities during this phase of the operation.

AIM: So what is our aim? AustraliaOne's aim and the aim of this brief, is to describe our actions during the next phase of operations.

INTENTION: Our intention comprises three parts Purpose, Method and End State. Purpose...what we're going to do...Method, how we're going to do it...and End State, what the world looks like when we're finished.

CONCLUSION

Ladies and gentlemen of Australia and the world. The future, it is now in our hands. We have a choice to remain slaves to an evil beyond description, to consign our children and grandchildren to lives of rape, torture and murder for the cabal's pleasure and profit OR, we participate in the liberation of our country and establish for the first time in our history, a truly sovereign nation, governed by representatives to answer to every man, every woman and every child in Australia.

My name's Riccardo Bosi, national leader of AustraliaOne. Thank you for your time.
